

Deliverable due date: M36 – November 2019

D8.7 Report on the activities of the Communication and
Dissemination Secretariat, v3
WP8, Task 8.5

Transition of EU cities
towards a new concept of
Smart Life and Economy

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

Project Acronym	mySMARTLife
Project Title	Transition of EU cities towards a new concept of Smart Life and Economy
Project Duration	1 st December 2016 – 30 th November 2021 (60 Months)
Deliverable	D8.7 Report on the activities of the Communication and Dissemination Secretariat, v3
Diss. Level	PU
Status	Working
	Verified by other WPs
	x Final version
Due date	30/11/2019
Work Package	WP8
Lead beneficiary	Steinbeis-Europa-Zentrum (SEZ)
Contributing beneficiary(ies)	All partners; special input: dissemination and communication secretariat, WP leader, LHCs and FCs
Task description	<p>Task 8.5: Dissemination and Communication strategy M1-60 [SEZ] (Input: all partners; special input: Dissemination and Communication Secretariat, WP leader, LHCs and FCs)</p> <p>An integrated Dissemination and Communication plan will be set up during the first four months of the project and reviewed annually. The general principles outlined in the 2012 guide published by the EC “Communicating EU Research & Innovation – a guide for project participants” will be followed. In this task, main target groups for communication and dissemination activities will be identified (e.g. LHCs, FCs, other cities as potential users of results, policy and decision makers (EU and national/regional level) stakeholders including local authorities, industrial partners, energy suppliers, research partners, financial providers, and citizens. Key messages for each target group will be created and a guide showing how to reach these using the CI will be developed.</p> <p>In order to steer this process, a D+C Secretariat will be setup, including WP leaders and LHC/FC representatives. It will be the central office for all requests and contacts of the project's target audience, supporting the Project Management (WP9) in external communication to related EU institutions, initiatives, projects, interested cities, industry, RTD/universities and citizens, as well as other multipliers. It will be in close contact to the local community of the LHCs and FCs to ensure specific request transfer, to join and/or support local dissemination and communication activities and to avoid overlapping of local activities. It ensures the development of a comprehensive corporate identity strategy including project logo and other design elements for use in different types of communication channel along with a user guide for the CI.</p> <p>In order to deploy this D+C strategy, a set of tools will be developed by the project team, in close interaction with the WP/Task Leaders. Key messages will be identified and transported in ways suited to the individual target groups. The following activities will be implemented:</p> <p>Subtask 8.5.1: Corporate identity design. A project logo, document templates will be created and a guide for their use will be developed.</p>
Task description	<p>Subtask 8.5.2: Website</p> <p>All partners, especially CAR, WP-leaders, LHs and FCs, led by SEZ will contribute to the public website development by providing necessary information that will be published by SEZ within m6. It will become an information hub for all relevant enablers of interested cities and communities (e.g. companies, research institutes and the public). It will present project objectives, activities and achievements in a way that relevant</p>

beneficiaries are able to understand and learn from the LHCs (video-clips, activities, news, events (performed in WP1-8)). It will have a press corner and will link to communities (e.g. through Twitter, LinkedIn, Blogs) and other EU projects. Interactive features, such as a message board, will be included to facilitate feedback from beneficiaries with opt-in, opt-out functionality. A download section will be included to provide all public documents of the project (e.g. flyer, newsletters, publishable documents and reports) as well as other useful documents like training materials. A secure area will be provided to a restricted community in which selected project information will be made available for the mySMARTLife network members and/or partners. The main language will be English; however, partners/contributors will deliver content in the relevant local language where necessary. The website will be regularly updated even for a certain period beyond the project end date. SEZ will subcontract the website development.

Subtask 8.5.3: Dissemination materials in English, incl. giveaways

- **A postcard** will be produced in M6 presenting project aims and expected results in English and local language of the LHCs and FLCs; 10,000 copies and PDF
- **A project leaflet** in English and local language of the LHCs and FLCs will be produced in M12 with information about the technologies, sites, approach etc.; 10,000 copies and PDF
- **Roll-ups** for each LH city in local languages promoting the local approaches will be developed by M6 as well as one overall roll-up in English for event promotion purposes (copies: one per country in the consortium)
- **Giveaways**, e.g. stickers, pencils with the website address and logo will be produced by M6 for project promotion purposes.

Subtask 8.5.4: Publications in technical and public press

SEZ will coordinate the development of project mailing lists: the Dissemination and Communication Secretariat and each partner will set up and maintain a project mailing list of interest groups, regional contacts and stakeholders to be informed about the project. If possible a shared address pool will be generated to enable large-scale mailings.

- **A series of press releases** (1/year) will be produced (Lead SEZ: WP-Leader, LHCs, FCs) to be published in newspapers/publications at local level to the general public without scientific backgrounds (e.g. CORDIS wire, Market Place Smart Cities and Communities, BUILDUP, CoM, LinkedIn groups, ICLEI, ERRIN, CIVITAS. They will report on project progress and interesting facts from the project.
- **Professional and scientific publications** (1/year) (Lead: SEZ, Partner: academia partner: CAR, ARM, VTT, HMU, TEC, NBK) will publicise research outputs from the project. Scientific publications, peer-reviewed papers, and international journals (e.g. IEEE Trans. Comm., Power Electronics, Smart Grids, and Sustainable Energy, International Journal of Green Energy) and on the public platform www.openaire.eu/
- **Regular distribution of an e-newsletter** (2/year) in English reporting on project progress and interesting facts from the project. Readers can subscribe/unsubscribe (Lead SEZ: WP-Leader, LHCs, and FCs).
- **LH city video clips** (Lead: SEZ, Partners: CAR, NBK, NAN, HAM, HEL, BYD, VAR, RIJ, PAL) lasting ½ - 1 minute show project progress in the LHCs will be produced, 1/year/LHC starting in year 2 with updates to inspire others to become FCs through interviews with leading figures from LH and follower city representatives. Each video clip will have its own character based on the project CI and will be published on YouTube, distributed to local TV stations (LH & FCs), or via EU Policy Broadcast: <http://www.vieews.eu>, European Broadcast Union: <http://www3.ebu.ch/home>, TVB Europe: <http://www.tvbeurope.com/tvbeurope>, Media Broadcast: <http://www.media-broadcast.com/en/startpage/aboutus/companyprofile/business-areas>. Broadcast on national TV could result.

Task description

- Starting in year 2, **Radio broadcasts** (1/year/LHC) (NAN, HAM, HEL) with short interviews on local radio stations are planned on the project progress covering technical and popular aspects in every LH city and if possible follower city are planned.

		<ul style="list-style-type: none"> • (lead: SEZ, contribution: all) Social media blogs, short messages will be published on the website and in specific social media platforms (e.g. LinkedIn Groups, Facebook, Twitter, BUILD UP, Market Place Smart Cities and Communities) to increase online interaction with diverse stakeholders. 1 article/blog approx. every 4 months. Hashtags (e.g. #mySMARTLife) will be added to project activities and used to build a strong community of stakeholders and followers for leverage. <p>Subtask 8.5.5: Best Practice booklet. A best practice book/guide will be developed summarising the implemented measures, lessons learnt and policy recommendations. It will be tailored to a large stakeholder group including big players, SMEs, end-users, communities, public bodies (local, regional, country and EU). It will be in English language and available electronically.</p>

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

1. Executive Summary

This document delivers a summary of the communication and dissemination activities performed from M25 to M36 of the mySMARTLife project. The report builds on the communication and dissemination activities:

1. delivered in M1 to M12 (the first year of mySMARTLife) – and the Report on the Activities of the Communication and Dissemination Secretariat, v1 (D.8.2)
2. delivered in M13 to M24 (the second year of mySMARTLife) – and the Report on the Activities of the Communication and Dissemination Secretariat, v2 (D.8.5)

The first two reports, mentioned above, as well as this report (D8.7) are both closely related to Task 8.5 “Dissemination and Communication strategy” of work package 8 “Exploitation, Dissemination and Communication”. This report at hand constitutes Deliverable 8.7 “Report on the activities of the Communication and Dissemination Secretariat, v3”.

Deliverable 8.7 builds upon the core dissemination and communication activities implemented in the first project year, such as the development of the overall dissemination and communication structure within mySMARTLife, the development of the project’s corporate identity and the design and production of main communication materials and tools. In the second project year, the dissemination and communication activities faced some challenges such as the European Data Protection law in May 2018 as well as the departure of Follower City Varna but mySMARTLife went from strength to strength and successfully resolved all challenges.

A special focus in this third reporting period was given to the production of videos as well as the involvement of local press through press releases and broadcasts. The purpose was to make the project as well as its actions known to a much broader audience. Also during this reporting period, the EC signed off an amendment outlining substantial changes to the mySMARTLife project. To mirror these changes the interventions on the website as well as the list of consortium partners that can be found on the all the promotional material had to be revised.

Overall, 188 communication and dissemination activities have been carried out from M25 to M36, reaching an estimated total of almost 1.9 Million people. These activities can be divided into 79 publications as well as further dissemination activities such as social media and website activities (excluding events) and 109 event related activities. Looking back over the first three years of mySMARTLife, the communication and dissemination activities can be summarised as follows:

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

599 dissemination and communication activities carried out
225 publications and further dissemination activities
(without events)
92 events organised
282 participations to events
326 mySMARTLife presentations given
Almost 2.5 Million persons reached (estimated audience)

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

2. Introduction

2.1 Purpose and target group

The purpose of “D8.7 – Report on the activities of the Communication and Dissemination Secretariat, v3” is to provide an overview of all activities that have been carried out by SEZ as Dissemination and Communication leader, the D+C Secretariat and all members of the mySMARTLife consortium in year three of the project. This report gives an insight into the outreach and promotion activities as well as the use of the various communication materials and channels. The primary target group of this report is the European Commission, another one is the project consortium itself as well as other SCC1 projects and interested stakeholders in general (as the report will be made available on [the mySMARTLife website](#)).

2.2 Contributions of partners

The following Table 1 depicts the main contributions from participant partners in the development of this deliverable.

Table 1: Contribution of partners

Participant short name	Contributions
SEZ	Writing of the deliverable, collection of information from the consortium
CAR	Review of the deliverable
All partners	Carrying out of activities, providing input regarding dissemination and communication activities

2.3 Relation to other activities in the project

The table below (Table 2) describes the main relationship of this deliverable to other activities (or deliverables) developed in mySMARTLife and that should be considered alongside this document to further enhance the understanding of its content.

As the press releases, blogs, articles, newsletters and scientific publications present the activities of mySMARTLife in general and of specific results in particular, they are related to various project activities and various work packages.

Table 2: Relation to other activities in the project

Deliverable Number	Contributions
D.8.7	This deliverable provides an overview of all communication and dissemination related activities of the project that have taken place from

	M25 to M36. These build on all project activities; therefore, it relates to all work packages.
D8.5	This deliverable provides an overview of all communication and dissemination related activities of the project that have taken place from M13 to M24 of mySMARTLife. These build on all project activities; therefore, it relates to all work packages.
D8.2	This deliverable provides an overview of all communication and dissemination related activities of the project that have taken place from M1 to M12 of mySMARTLife. These build on all project activities; therefore, it relates to all work packages.

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

3. Objectives and expected Impact

3.1 Objective

The objective of the deliverable “D8.7 – Report on the activities of the Communication and Dissemination Secretariat, v3” is to provide an overview of all dissemination and communication activities of the entire consortium, with a special focus of the project’s communication channels and tools, implemented within work package (WP) 8. It gives an overview of the outreach and promotion activities of the project as well as the different communication materials and channels developed.

Objectives of the dissemination and communication related activities of WP 8 “Communication, Dissemination & Exploitation” are the following (as stated in the Description of Action):

- The Communication and Dissemination Secretariat will ensure an effective communication and dissemination at local, regional, country and EU-level to provide maximum replication of the project.
- The dissemination and communication strategy will ensure a continuous alignment of the dissemination and communication to the current development of the project.
- The substantial dissemination and communication tool mix will ensure an effective and sound target group tailored dissemination and communication of the project in general and its results.
- Webinars will inform, disseminate and discuss project outcomes to/with key stakeholders at local, regional, national, and European level.
- Participation at events, the project website, the best practice book and the final conference enable a sustainable and sound dissemination and communication of the project in general and its results.

In the second project year, dissemination and communication activities were firmly build upon the structures and strategies developed in the first year. Additional communication tools were produced, and materials were reviewed, adapted and reproduced (such as postcards, please see [5.2.1 Project Tools](#)). All objectives have been achieved.

3.2 Expected Impact

The impact expected by these activities is to promote mySMARTLife and to disseminate its results throughout Europe as well as beyond (please see the [mySMARTLife Network](#)). This includes the European level as well as the national, regional and local levels – where Lighthouse and Follower Cities carry out many activities. The following picture gives an overview of all the 16 cities taking part in the mySMARTLife Cities’ Network:

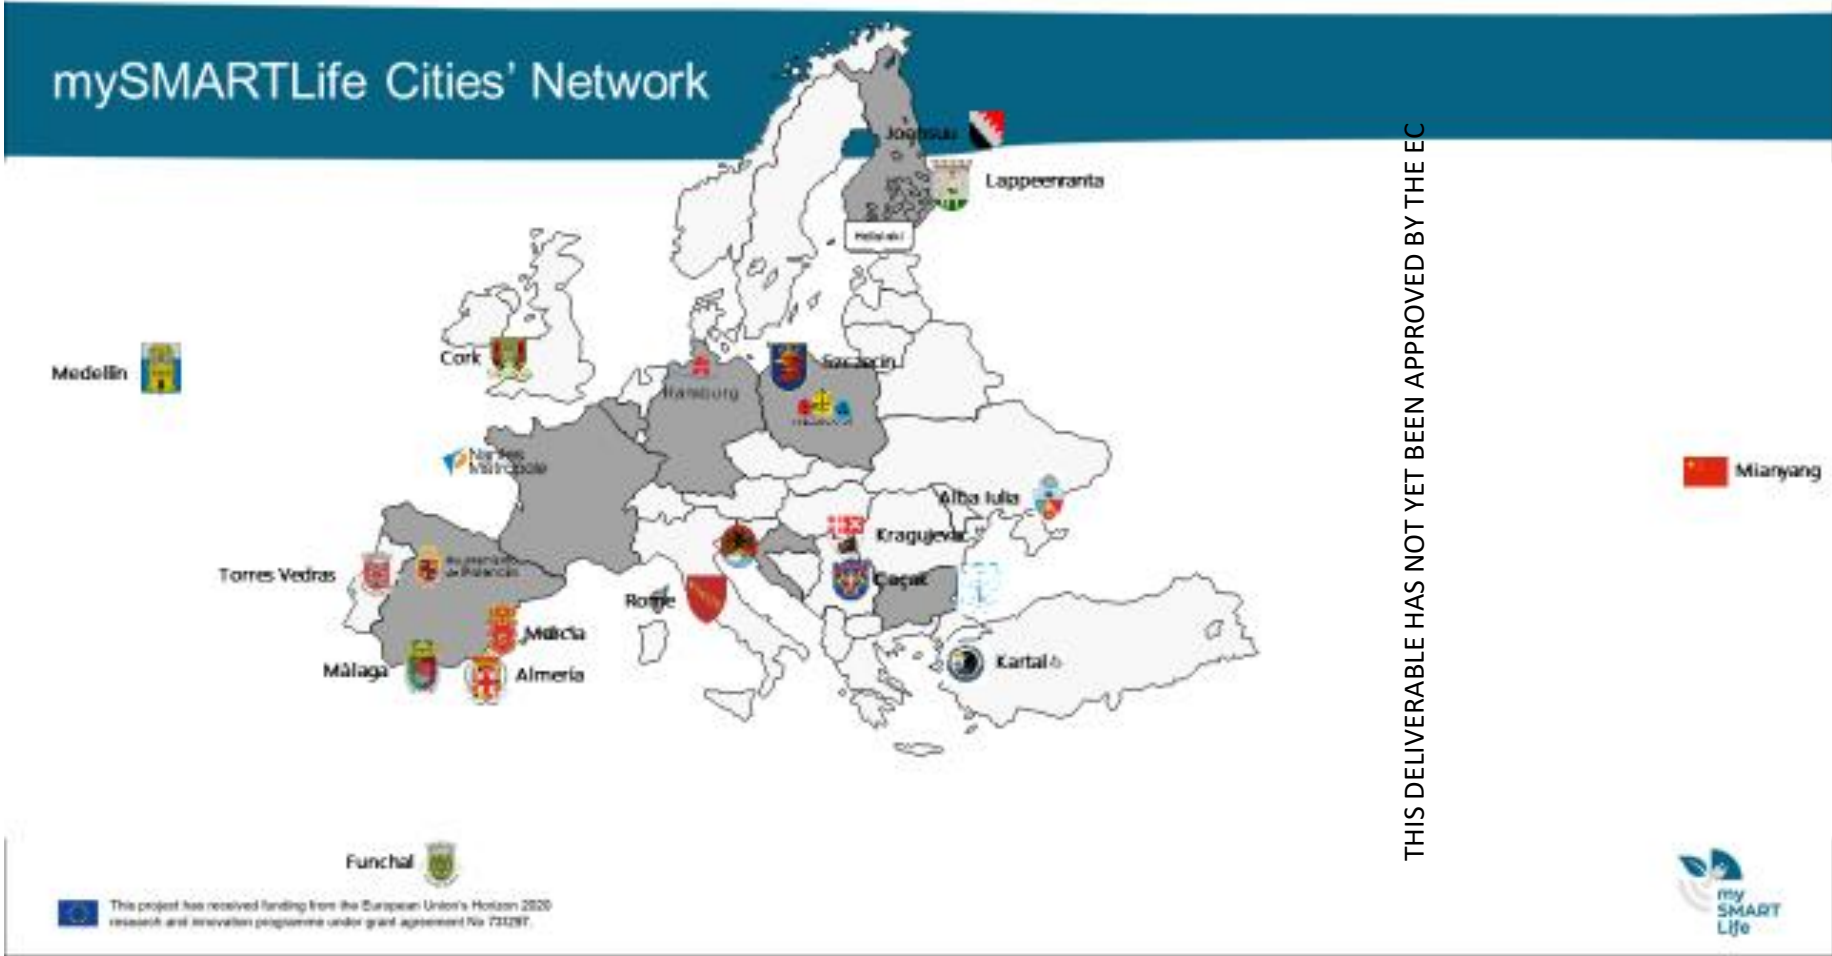

Figure 1: mySMARTLife Cities' Network

4. Overall Approach

This deliverable contains on the one hand the activities coordinated by SEZ as work package leader – such as the further development of the website, publishing of the e-newsletter and all other main project communication and dissemination tools as well as the attendance at various events.

On the other hand, all communication and dissemination activities carried out by all partners, also on a local level, are summarised. SEZ contacts all consortium partners regularly for an update on their individual communication and dissemination actions via a shared google document as shown below. Based on the partners input, an overview of all PR related activities is achieved.

ID	Status [use drop down]	Partners [short names]	Type of event [use drop down]	Title of the event	Date Start date - End date [DD.MM.YYYY Y]	Place [city, country]	Type of audience reached [use drop down / if several types auf audience, please precise in the comment field on the right]	Size of audience	Countries addressed	URL

Figure 2: Shared Google Doc

As stated above, all partners proactively communicate and disseminate their mySMARTLife activities. Press releases, blogs, articles, newsletters, scientific publications, videos and broadcasts present the activities of mySMARTLife in general and of specific results in particular. They are related to all project activities and all work packages.

5. Overview of the mySMARTLife Dissemination and Communication activities from M25-36

The following section provides an overview of all communication and dissemination activities that have been carried out from M25 to M36 of the project by the WP8 leader SEZ, the Dissemination and Communication Secretariat and the entire mySMARTLife consortium.

The communication and dissemination work of mySMARTLife concentrated in the third reporting period on substantially increasing its impact numbers using mass media i.e. the production of additional videos, the set-up of a YouTube channel, radio and TV broadcasts.

Furthermore, a substantial amount of additional information was added to the website such as a [new section Publications & Media](#). In late summer, the EC signed off an amendment that described modifications to the mySMARTLife consortium such as a new partner as well as updated interventions in the LHCs. These changes included into the mySMARTLife website and all relevant PR materials.

Examples of these adaptations are found in the various sections of the report.

5.1 Looking Back – mySMARTLife Communication and Dissemination Activities from M1 to M12 and from M13 to M24

During the first year of mySMARTLife, all partners carried out a wide variety of communication and dissemination activities. The focus of M1 – M12 was on the development of the overall communication and dissemination structure (setting up the Dissemination & Communication Secretariat), including the projects corporate identity and host of the website as well as a host of dissemination and communication tools. For further insight into the achievements of WP8 (Communication and Dissemination), please see D8.2 Report on the activities of the Communication and Dissemination Secretariat, v1 (WP8, Task 8.5) covering the project period from M1 to M12.

During the second year of mySMARTLife, all partners carried out a wide variety of communication and dissemination activities. The focus of M13 – M24 was on adapting the dissemination and communication activities to the new reality of a changed consortium (reproduction and redesign of various communication tools) and increasing the outreach at the same time. Thanks to the support of the consortium and especially the project leader, this challenge was successfully met.

5.2 mySMARTLife Dissemination and Communication Tools and Activities

Within mySMARTLife, a mix of different dissemination and communication tools is applied, covering both printed and digital channels as well as other tools. This multichannel approach ensures that a broad range of stakeholders and target audiences is reached. The following table provides a concise overview of the

main tools used within mySMARTLife, their respective targets groups, aims and mySMARTLife actors. The following sections describe the tools in more detail.

Table 3: Overview of mySMARTLife D+C tools, target groups and aims

D+C Tools / Activities	Target groups	Aim	Actor
Project website	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform (in detail) about the project, its aims, objectives, activities, news	SEZ, based on input by D+C Secretariat
Postcard	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform about the project, to promote the network, to link to website	SEZ / CAR
Project leaflet	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform about project, aims, objectives, technologies, sites, approach, to promote the network, to link to website	SEZ / CAR
Roll-ups / Poster	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform about the project	SEZ, based on input by D+C Secretariat
Press releases	Media (both general and with scientific / technical focus)	To raise interest in mySMARTLife, to inform about project news, to link to website	SEZ / CAR, based on input by D+C Secretariat
Professional and scientific publications	Scientific / technical audience	To disseminate project results	SEZ, Academia partners: CAR, ARM, VTT, HMU, TEC, NBK
e-newsletter	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform about project news, to link to website	SEZ, based on input by D+C Secretariat

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

LHC video clips	All (general public, scientific / technical audience, media)	To show the progress in the LHCs, to inspire other cities	LHCs (NAN, HAM, HEL)
Radio broadcasts	All (general public, scientific / technical audience, media)	To promote technical and popular aspects of the LHCs	LHCs (NAN, HAM, HEL)
Social media	All, depending on channel (Twitter: all audiences, LinkedIn: stronger focus on scientific / technical audience)	To raise interest in mySMARTLife, to inform about project news, to promote the network, to foster discussions on mySMARTLife topics	SEZ, based on input by D+C Secretariat All partners engage actively
Blogs and short articles	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform about project news and technical issues	SEZ, based on input by D+C Secretariat and other partners
Best practice booklet	Whole range of stakeholders involved in the process of district retrofitting	To promote mySMARTLife results, to assure take up of activities	SEZ together with D+C Secretariat, input by all project partners
Webinars with interested stakeholders	Enablers (e.g. industrial stakeholders, SME; energy providers, energy performance contractors, RTD, universities)	To allow enablers to learn about implementation in LHCs and replication actions by FCs	SEZ with LHCs / FCs / CAR, input from all project partners depending on topic
Event participation	All, depending on event	To increase the visibility of mySMARTLife	All project partners

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

Final conference	All (general public, scientific / technical audience, media)	To promote mySMARTLife results, to demonstrate the implementation of actions in the LHCs and the FCs approaches	CAR together with D+C Secretariat, input by all project partners
Partners' websites	All (general public, scientific / technical audience, media)	To raise interest in mySMARTLife, to inform about the project, its aims, objectives, to link to mySMARTLife website	All project partners
Partners' social media channels	All, depending on channel (Twitter: all audiences, LinkedIn: stronger focus on scientific / technical audience)	To raise interest in mySMARTLife, to inform about project news, to foster discussions on mySMARTLife topics	All project partners

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

5.2.1 Project tools

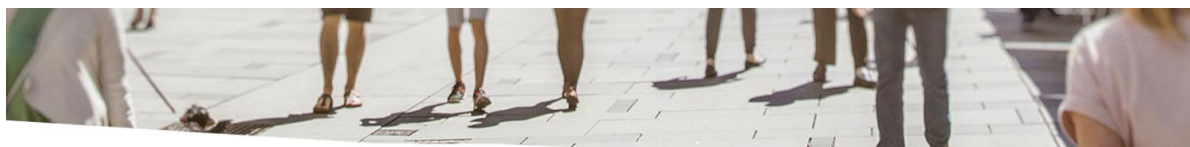

SEZ as the Dissemination and Communication leader is responsible for the planning and realisation of the dissemination and communication tools and activities, with input by the project coordinator and / or the project partners. Together, they constitute an organised structure to describe the entire project in all its complexity. Choosing different tools aims to present different aspects of the project to a diverse audience. They do all have in common their high recognition value as the project's CI is used consistently in all tools.

- **Project website**

The mySMARTLife website (www.mysmartlife.eu) is one of the key instruments for internal and external communication. The website is the central communication and knowledge hub for the project partners and was set up at the beginning of the project. Following the Corporate Identity of mySMARTLife, this website offers general and individual information for internal and external purposes in a clear and structured manner.

SEZ is responsible for the website's set-up and maintenance, whereas the content is strongly dependent on the input of the project partners in general and of the work package leaders, LHCs and FCs in particular. The website also links to the project's social media channels.

SEZ has commissioned the programming of a deliverable section for the website with the aim of uploading all public deliverables during the lifespan of the project. During this reporting period, 25 public deliverables were uploaded and are therefore accessible to the stakeholders and the general interested public. For the further uploading of the deliverables, a process was agreed with the project coordinator.

Public Deliverables

mySMARTLife project activities consist of several work packages dealing with different topics. The mySMARTLife consortium would like to share the experiences gained in their public deliverables. Please click on the title in the list below to download the full document.

WP1: Definition of an Innovative Urban Transformation Strategy

- ▶ [D1.1 Social acceptance campaign at local and district level](#)
- ▶ [D1.3 Methodology for citizen engagement based on system thinking](#)
- ▶ [D1.10 Urban Coaching: Description of coached areas and their selection for Mentoring](#)
- ▶ [D1.12 Description of 3D models for each pilot](#)
- ▶ [D1.13 Compilation of energy system scenarios for each lighthouse city](#)

Figure 3: mySMARTLife Website – Public Deliverables

Due to the amount of new information available on the website, a new website section was programmed and designed called [Publications & Media](#). Here, the user can find subpages including information materials,

webinars, videos & radio broadcasts, scientific publications as well as the previously mentioned public deliverables.

Due to the previously mentioned amendment, the interventions described on the mySMARTLife website have been updated.

Publications & Media

The mySMARTLife consortium produces different kinds of publications and media that we would like to share with you:

- ▶ [Information Materials](#)
- ▶ [Webinars](#)
- ▶ [Videos & Radio Broadcasts](#)
- ▶ [Scientific Publications](#)
- ▶ [Public Deliverables](#)

Figure 4: mySMARTLife Website – Publications & Media

Furthermore, the partnership working with all other Lighthouse City projects and other relevant European Initiatives was further promoted and a comprehensive list of [Useful Links](#) was added to the website.

- **Project leaflet, postcard and poster**

The project leaflet and project postcard are major communication tools, as they provide core information of mySMARTLife. Whereas the postcard offers only basic information on mySMARTLife, the leaflet provides detailed information on the project, the involved cities, the consortium, technologies, sites and approach.

The mySMARTLife leaflet is translated into all local languages of the LHCs and FCs (FR, DE, FIN, KR, PL, and SP). All communication materials are available in printed and electronic versions ([downloadable from the project website](#)) and distributed in the LHCs and FCs, on events and to interested stakeholders.

What is mySMARTLife about?

The mySMARTLife project aims at making the three Lighthouse Cities of Nantes, Hamburg and Helsinki more environmentally friendly by reducing their CO₂ emissions and increasing the use of renewable energy sources.

Activities are focusing on "Inclusive Cities", offering a high quality of life to residents. "Smart People" are playing a vital role in their city's development. "Smart Economy" is an innovative and dynamic economic concept aiming at guaranteed employment and an adequate income, attracting talents as well as providing goods and services.

An integrated planning process, where citizens are actively involved in the decision making, links the actions in different fields (e.g. mobility, sustainable energy, ICT). Following a structured city business model leads to an integrated urban transformation strategy, which is transferable to other cities.

Partners

Besides the mySMARTLife Lighthouse and Follower Cities, 16 cities from Europe and beyond exchange experiences and learn directly from the mySMARTLife findings and results. Together, they build up the mySMARTLife Cities Network, a strong network of cities, to make their cities smarter and more sustainable.

Transition of EU cities towards a new concept of Smart Life and Economy

3 Lighthouse Cities • 3 Follower Cities • 27 Partners • 6 Countries

A taster of some of the innovative mySMARTLife Interventions

Smart E-Busway XXL in Nantes

In Lighthouse City Nantes, preparatory actions to integrate electric high capacity buses on a bus rapid transit (BRT) line are in progress. By acquiring 22 E-busways (24m long, 100% electric) and developing an energy management system completely transparent for the bus line operation, Nantes responds to the citizens' high demand for efficient public transport and tackles climate change at the same time.

Smart Mobility in Hamburg

Although the mobility interventions affect the whole City of Hamburg, they are a focused activity in the borough of Bergedorf. Here, electric buses, e-cars, e-bikes and the "Citykater" (a small last mile e-scooter) for public and private fleets are implemented as well as e-bus charging stations at the bus depot and a set of private and public stations for e-cars.

Smart Construction in Helsinki

As part of mySMARTLife, Helsinki is promoting the transition towards decentralised energy production and increasing the share of renewable energy sources. Activities are focused on the construction of a high performance residential zone, smart home solutions, smart building solutions and the integration of renewable energy sources for example to the e-mobility charging network.

The Lighthouse Cities

Nantes – Smart urban transformation for citizens

Nantes is the sixth largest city of France, with a metropolitan area of over 600,000 inhabitants. As part of mySMARTLife, Nantes has 47 actions from smart lighting and smart charging stations to an urban ICT platform and an energy database which contribute to its energy transition roadmap set up in 2016, based on the results of a large citizen engagement process.

Hamburg – More liveable space for more residents

The Free and Hanseatic City of Hamburg is the second largest city in Germany, with its 1.8 million inhabitants. Hamburg is implementing actions from smart streetlights and new bicycle connections to smart heating islands and new electric buses.

Helsinki – Where history and presence lead into a smart future

Helsinki, the capital of Finland, has a population of over 626,300 inhabitants. The mySMARTLife project with its 47 actions is a major step towards Helsinki's target to become carbon neutral in 2035.

The Follower Cities

Bydgoszcz (Poland) – Continuous engagement towards a smart future

Bydgoszcz is located in northern Poland, facing the rivers Brda and Vistula and has almost 360,000 residents. Due to Bydgoszcz's engagement in various European programmes, numerous smart solutions have already been implemented. One example is an intelligent transportation system which steers traffic through vision-based monitoring.

Rijeka (Croatia) – On the way to transformation with modern ICT infrastructures

Situated at the Adriatic Sea, Rijeka is the third largest city in Croatia, with a population of 128,624 residents. Over the last decade, Rijeka has put strong efforts into urban development projects, particularly into the use of renewable energy sources in public transportation.

Palencia (Spain) – Transferring successful big scale solutions to a smaller scale

Palencia is located in the North Northwest region of Spain and has 80,000 residents. The city has been a pioneer in implementing electric car-sharing and in replacing its municipal fleet with electric vehicles (EV). It promotes public EV charging points and fosters cyclists mobility through bike rental and dedicated cycle paths.

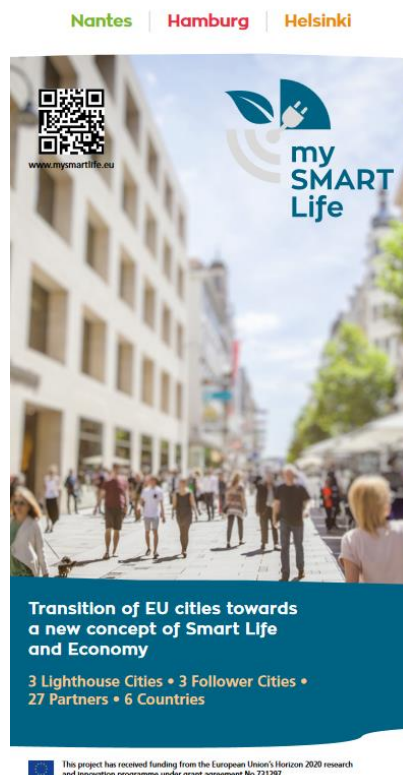

Figure 5: English Version of the mySMARTLife Leaflet and Amended Postcard

All postcard versions and the leaflet can be found in <https://www.mysmartlife.eu/publications>

Due to the amendment, outlining the changes to the mySMARTLife consortium and its actions a major review of all promotional material has commenced.

- **Press releases**

The **first press release** was published at the beginning of the project, providing basic information on mySMARTLife (first reporting period M1-M18). The **second press release** was published after the periodic meeting that took place in Hamburg, Germany on 11-13 September 2018. The release focused on the study tour to the demonstration site Bergdorf. A **third release** was published announcing the mySMARTLife YouTube channel and the publication of the first three videos from the LHCs in M25. The **fourth release** of the reporting period was published in M28 describing the workshop and study tour delivered for the mySMARTLife Cities' Network members during the periodic meeting in Nantes. A **fifth press release** was published after the review and periodic meeting in M34 in Helsinki.

The archive of press releases is available on the mySMARTLife Website under: <https://www.mysmartlife.eu/press-corner>

- **Professional and scientific publications**

mySMARTLife academia partners (namely CAR, ARM, VTT, HMU, TEC, and NBK) publicise research outputs from the project as scientific publications, peer-reviewed papers in international journals (e.g. IEEE Trans. Comm., Power Electronics, Smart Grids, and Sustainable Energy, International Journal of Green Energy) and on the public platform www.openaire.eu. Each partner ensures open access (free of charge online access for any user) to all peer-reviewed scientific publications relating to its results.

During the reporting period, three additional scientific publications have been published. The total of scientific publications since the start of mySMARTLife is currently nine, whereas one scientific publication is related to mySMARTLife but not funded by it. Five additional scientific publications have been submitted and are currently in the review process. All publications can be found [here](#).

Further information is in Annex I: Overview of Publications and further Dissemination Activities (without Events).

- **e-newsletter**

The public e-newsletter, published twice a year, is providing information about the project's activities and progress during the previous period. SEZ is responsible for writing the newsletters, with active input by and information from all partners, especially the LHCs, the WP leaders and CAR as the project coordinator.

For the time span of this report, two e-newsletters have been published, the latest one in June 2019 (newsletter No.5). The newsletters can be found [here](#) on the mySMARTLife website.

The first newsletter in this reporting period was newsletter No.4 published in December 2018 and it focused on the topic of the mySMARTLife e-Mobility but also included news from all three Lighthouse Cities as well as projects news and events.

mySMARTLife – Focus Topic

mySMARTLife Lighthouse Cities test E-mobility solutions

Mobility – the Challenge of today's cities

Today, 55% of the world's population lives in urban areas, a proportion that is expected to increase to 68% by 2050. Projections show that urbanisation, the gradual shift in residence of the human population from rural to urban areas, combined with the overall growth of the world's population could add another 2.5 billion people to urban areas by 2050 according to an UN Report dated May 2018.

With expanding cities, mobility becomes a challenge that affects the environment, our quality of life as well as our health. In mySMARTLife, various mobility actions are being tested and implemented such as driverless buses, free charging points for electric bicycles, XXL buses and converting a traditional local bus depot to allow successive installation of charging infrastructure up to a fully electrified depot by 2030.

E busway in Nantes

[READ MORE](#)

Figure 6: mySMARTLife Newsletter No.4 – mySMARTLife e-mobility

The second newsletter of the reporting period (No.5) was published in June 2019 and focused on the important role of citizen engagement in mySMARTLife. Of course, the newsletter also covered other exciting news from the project such as citizen photovoltaic power plant to autonomous driving buses and virtual reality walks.

mySMARTLife – Focus Topic

Citizen engagement in mySMARTLife

All of us that work in smart city projects are aware of the fact that citizen engagement is key to the implementation of interventions in the urban environment. After all, what are urban centres all about? They are about the citizens that live, work and play here.

As part of mySMARTLife, the Lighthouse Cities Nantes, Hamburg and Helsinki are continuously involving residents in various ways. In this article, we explore some of the measures used when it comes to entering into a dialogue with citizens.

[READ MORE](#)

Figure 7: mySMARTLife Newsletter No.5 –Citizen Engagement across all mySMARTLife LH and FCs

- **LHC video clips**

Short video clips showing project progress in the LHCs have been produced by the LHCs, with the aim of inspiring other cities. All three LHCs produced their first video and displayed them at the Smart City Expo World Expo in Barcelona (13-15 Nov 2018). Hamburg has already produced a second video in a German and English version describing its activities in the demo site Bergedorf.

All videos can either be found on [the mySMARTLife website](#) as well as on [the mySMARTLife YouTube channel](#). The video channel was further promoted through a press release - [mySMARTLife Video Channel: Dance, Fly and Learn](#). Our YouTube channel has had 1.650 views (as of beginning of November 2019).

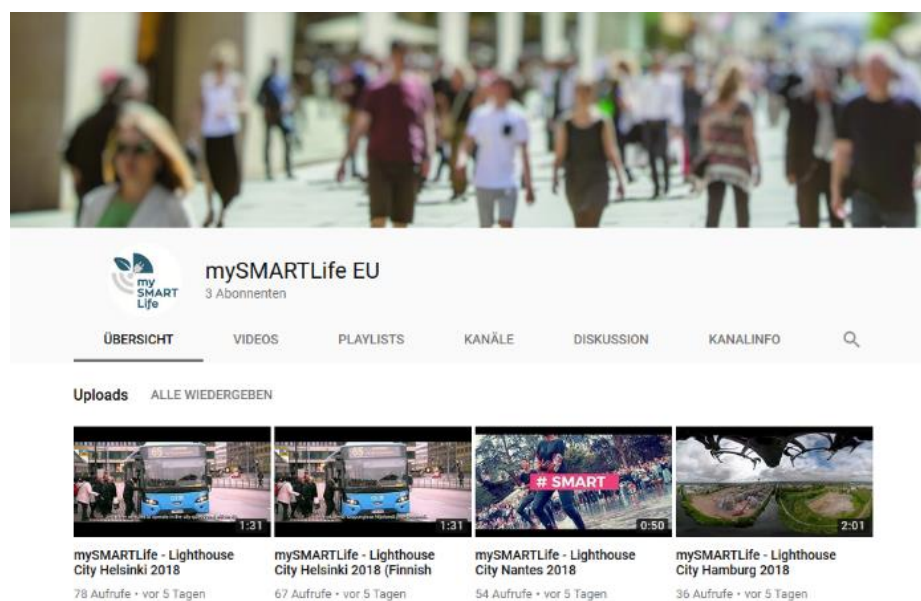

Figure 8: mySMARTLife – YouTube channel

- **Broadcasts (Radio & TV):**

LHC Nantes has produced radio broadcasts with short interviews on local radio stations during the fifth periodic meeting in Nantes in March 2019. These broadcasts are translated into English to reach a wider audience. The broadcasts, which include a host of interviews of mySMARTLife consortium partners, are [here](#). Furthermore, LHC Helsinki has been interviewed and the radio broadcast is on the mySMARTLife website [here](#).

mySMARTLife has also received TV attention and was covered in the German National TV (NDR) the broadcast can be watched here: [Hamburg1](#) and [NDR](#).

Diese EU-Projekte stecken in der Hansestadt Auf Europa-Tour in Hamburg

Figure 9: mySMARTLife – on German TV

• Social media

For a trend-setting project like mySMARTLife, it is inevitable to integrate social media in the dissemination and communication strategy, addressing and involving both professional and private users. The aim is furthermore to raise attention regarding mySMARTLife and its activities and results, to involve the target groups in the project, for example via discussions on LinkedIn, and to raise interest in the project's dissemination and communication tools, for example directing them to the project's website, where more detailed information can be found. The social media activities are complementing the rest of the mySMARTLife dissemination and communication tools.

mySMARTLife uses two social media profiles:

- **Twitter:** A mySMARTLife Twitter account has been created (https://twitter.com/mySMARTLife_eu) with currently 1.163 followers, 975 tweets and 1.303 likes (Status: 06.11.2019)
- **LinkedIn:** A mySMARTLife discussion forum was established at the beginning of the project and the number of members has substantially increased in the second reporting period from 74 members (last reporting period) to 206 members in this reporting period (<https://www.linkedin.com/groups/13531338>)

Figure 10: mySMARTLife – Twitter account (28.10.2019)

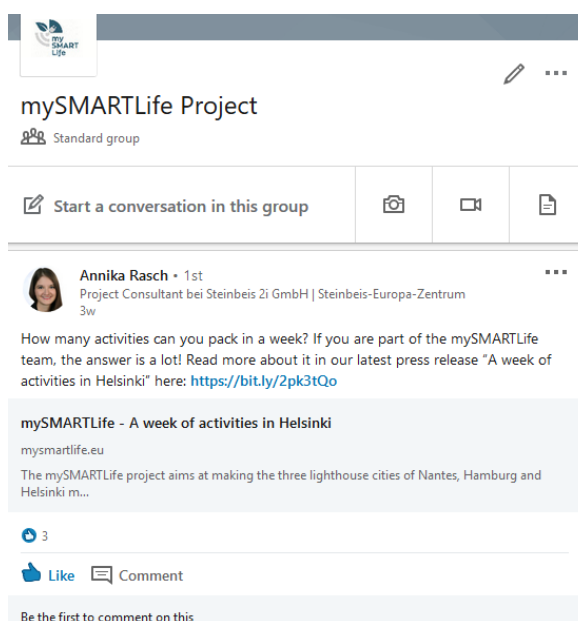

Figure 11: Screenshot of mySMARTLife LinkedIn discussion group (Status: 28.10.2019)

- **Blogs and short articles**

Short articles on the actual development status and on specific technical topics are regularly published on the project website, based on input from all partners, according to the project achievements.

During the reporting period, 26 short articles were published, covering a wide range of subjects from energy themes: such as [Viikki Environment House becomes even more energy-efficient thanks to mySMARTLife](#) to mobility news like the [Autonomous Shuttle bus tested in Nantes](#), SCC1 news like [Smart City Lighthouse Projects meet at the European Smart Projects Summit in San Sebastian](#) and partnership articles like [Meeting of Finnish Lighthouse Project Cities in Oulu](#). A full list of articles is on the mySMARTLife website in the [news section](#).

- **Summary**

For the reporting period M25 to M36, 79 publications and further dissemination activities without events were reported. These included 73 non-scientific publications, news articles published on the mySMARTLife website, local press releases as well as broadcasts on local radio stations.

An estimated audience of almost 1.9 Million people has been reached by these activities, constituting amongst others the scientific community, industry, civil society, media as well as the public.

A detailed overview is in Annex 1: Overview of Publications and further Dissemination Activities (without events).

5.3 Publications and further Dissemination Activities

All mySMARTLife partners have been very active within months 25-36 of the project in communicating the project. This constitutes itself through active event participations, general publications and peer-reviewed articles. The following sections provide an overview of all scientific and other publications prepared and dissemination activities carried out between M25 and M36 by all project partners.

5.3.1 Scientific Publications (Peer Reviewed)

The number of scientific publications has substantially increased in this third reporting period. So far, nine scientific publications have been published to engage with an expert audience as part of mySMARTLife. The list of publications is online [here](#).

- Angela Santangelo, Marja Vuorinen, Simona Tondelli, Household energy awareness as enabler of regeneration practices. Preliminary evidence from a Finnish case study, *Urbanistica Informazioni*, special issue, 2018, pp. 260-264.
- Mohamed Tahar Mabrouk, Pierrick Haurant, Vincent Dessarthe, Patrick Meyer, Bruno Lacarrière, Combining a dynamic simulation tool and a multi-criteria decision aiding algorithm for improving existing District Heating, 16th International Symposium on District Heating and Cooling, Elsevier, *Energy Procedia* 149, 2018, pp. 266-275.
- Miika Rämä, Mikko Wahlroos, Introduction of new decentralised renewable heat supply in an existing district heating system, *Energy*, Volume 154, 2018, Elsevier, 1 July 2018, pp. 68-79.
- Hannu-Pekka Hellman, Atte Pihkala, Markku Hyvärinen, Pirjo Heine, Juha Karppinen, Kristiina Siilin, Perttu Lahtinen, Minna Laasonen, Jussi Matilainen, Benefits of Battery Energy Storage System for System, Market, and Distribution Network - Case Helsinki, 24th International Conference on Electricity Distribution, CIRED, Glasgow, 2017, pp. 1-5. (This publication is related to mySMARTLife but not funded under mySMARTLife.)
- Mikko Martikka, Timo Ruohomäki, Sonja Salo, Pekka Tuomaala, Kristiina Siilin, Esa Nykänen, Smart City Resilience with Active Citizen Engagement in Helsinki, 2018 International Conference on Intelligent Systems (IS), IEEE, 2018.
- Timo Ruohomäki, Outi Kesäniemi, Enni Airaksinen, Mikko Martikka, Petteri Huuska, Jarmo Suomisto, Smart City Platform Enabling Digital Twin, 2018 International Conference on Intelligent Systems (IS), IEEE, 2018.
- Xabat Oregi, Nekane Hermoso, Eneko Arrizabalaga, Lara Mabe, Inigo Munoz, Sensitivity assessment of a district energy assessment characterisation model based on cadastral data, Int. Scientific Conference "Environmental and Climate Technologies", CONECT 2018, Elsevier, *Energy Procedia*, 147, 2018, pp.181-188.

- Jörg Knieling, Katharina Lange, Smart City Governance in practice – The example of mySMARTLife project in Hamburg, Real Corp 2019 – Is this the real world? “Perfect Smart Cities vs. Real Smart Cities”, REAL CORP 2019, pp. 671-677.
- Francesc Pardo-Bosch, Carles Cervera, Tamyko Ysa, Key aspects of building retrofitting: Strategizing sustainable cities, Journal of Environmental Management, Volume 248, 2019, 109247, Elsevier.

Details can be found in Annex I: Overview of Publications and further Dissemination Activities (without Events).

5.3.2 Publications and further Dissemination Activities (without Events)

A total of 72 publications and further dissemination activities (without events) have been reported for M1-12 of the project.¹

For the reporting period M13 - M24, 74 publications and further dissemination activities (without events) were reported.²

For the third reporting period M25 – M36, 79 publications and further dissemination activities (without events) were reported.

- 26 Non-scientific and non-peer reviewed publications (popularised publications)
- 6 scientific publications
- 12 press releases
- 6 social media activities (including regular tweets on different profiles)
- 8 website actions
- 10 videos
- 2 flyers
- 9 communication campaign

An estimated audience of almost 1.9 Million persons has been reached by these activities, constituting the scientific community, industry, civil society, media, the general public and customers.

¹ 15 Non-scientific and non-peer reviewed publications (popularised publications), 11 press releases, 13 social media activities, 26 website actions, 2 videos published on YouTube, 1 communication campaign, 4 other dissemination activities

² 44 Non-scientific and non-peer reviewed publications (popularised publications), 2 scientific publications, 9 press releases, 9 social media activities (including regular tweets on different profiles), 4 website actions, 3 videos, 2 flyer, 1 communication campaign

A detailed overview can be found in Annex I: Overview of Publications and further Dissemination Activities (without Events).

5.4 Organisation of and Participation in Events

Partners participate actively in events not organised by the consortium at national and international level to stimulate interest from "new" stakeholders, including the public and end users. The project is presented in presentations or with posters or other materials whenever possible. Key European events are identified and selected (e.g. European Sustainable Energy Week, Annual Conferences of the Market Place Smart Cities and Communities as well as the General Assembly of the EIP-SCC).

An overview of events is generated based on the input of all partners. This provides an important overview of all past and future event related activities by the consortium and helps in coordinating the partner's activities. All partners are constantly updating this.

Several events in the Lighthouse Cities have been organised within mySMARTLife. Highlights include:

- **Boosting Investments for Smart Cities – Keynote speech by Helen at Covenant of Mayors Investment Forum (Brussels, February 2019)**

mySMARTLife project was presented as part of a keynote speech at the Covenant of Mayors Investment Forum - Energy Efficiency Finance Market Place, which was held in Brussels from 19th to 20th February 2019. Pirjo Jantunen, a Corporate Social Responsibility Manager at Helen Ltd., Helsinki, gave a keynote speech titled "Boosting Investments for Smart Cities".

Figure 12: Pirjo Jantunen's keynote at Covenant of Mayors 2019³

³ Photo credits: The Executive Agency for Small and Medium Sized Enterprises - EASME

- **Smart City – experience and shape urban development (Hamburg, May 2019)**

As part of the European Week in Hamburg, mySMARTLife partner konsalt organised an event on 7 May 2019 with the motto “Smart City – experience and shape urban development”. Over 60 participants followed the invitation to the Competence Center for Renewable Energy and Energy Efficiency (CC4E) of Hamburg University of Applied Sciences (HAW Hamburg) in Hamburg-Bergedorf.

Figure 13: Presentation at European Week in Hamburg⁴

- **mySMARTLife at Sustainable Places (Cagliari, June 2019)**

mySMARTLife took also part at Sustainable Places (June 5-7) in Cagliari, Italy. Irantzu Urkola presented the project and its methodology on the final day of the conference from Tecnalia Research & Innovation during a “Smart Cities” paper session.

This year, more than 350 people attended the seventh edition of Sustainable Places that provides a framework for presentations of project results emerging from Horizon 2020, workshops, and networking between different stakeholders. Thematically, the conference did focus on island sustainability, investing in EE retrofit, demand response, sustainability protocols, and Smart Cities.

- **Take a ride - mySMARTLife at Helsinki Day (Helsinki, June 2019)**

On 12 June, the Finnish capital did celebrate its birthday – and of course, mySMARTLife could not miss this joyful occasion. For this purpose, everyone interested in automated vehicles was invited to enjoy a ride into the future in Kalasatama district. There, a robot bus, operated by Helsinki RobobusLine, ran nonstop between

⁴ Photo credits: konsalt

9 a.m. – 3 p.m. At the end of the day, 152 people did join the ride. For most of them, it was the first time on a robot bus and their feedback was consistently positive. There was also time for animated discussions about the buses' technology and its daily mobility.

Figure 14: Robotbus at Helsinki Day⁵

- **mySMARTLife at EUSEW (Brussels, June 2019)**

This year's EUSEW - the EU Sustainable Energy Week - took place in Brussels from 17 through 21 June. The SCIS team joined forces with the EIP-Marketplace on a stand in the networking village and organised two sessions on Tuesday, 18 June. mySMARTLife contributed to the second session [Empowering and financing sustainable energy projects](#) with speaker Krista Jaatinen (Helen Ltd.). The purpose of the workshop was to present empowering and financing models that are currently being used to (i) retrofit the existing building stock in Europe, (ii) finance renewable energy infrastructure and (iii) facilitate combined public-private investments in energy assets. Projects that have implemented the three models will present themselves and share experiences.

⁵ Photo credits: Eetu Rutanen, Metropolia University of Applied Science

Figure 15: Krista Jaatinen (Helen Ltd.) presents at EUSEW⁶

- **Finnish Lighthouse City Information Exchange Event (Oulu, August 2019)**

In August (19th & 20th), the Lighthouse City Oulu (MAKING-CITY) invited all Finish Lighthouse Cities for an information exchange event. Included in the event were representatives from Tampere ([Stardust](#)), Vaasa ([IRIS](#)), Kerava ([MAchUP](#)) and Helsinki (mySMARTLife). The main purpose of the event was to share experiences, lessons learnt and discuss further collaboration but also spent time together to visit the Kaukovainio demo site.

⁶ Photo credits: Steinbeis-Europa-Zentrum

Figure 16: Bike tour in Kaukovainio⁷

- **Cities in the Forefront of Digitalizing Europe (Brussels, October 2019)**

During the high-level seminar “Cities in the Forefront of Digitalizing Europe: Helsinki’s Journey to Becoming the Most Functional City in the World”, organised by the City of Helsinki on 1st of October, participants did learn and discuss cities’ digital transformation in the field of interoperability, sustainability, IoT and data management. The event was linked to the Finnish EU Presidency themes.

Overall, for the reporting period M25-M36,

- 17 events were organised:
 - 1 conference
 - 15 workshops
 - 1 exhibition
- 92 participations to events took place:
 - 18 conferences
 - 14 workshops

⁷ Photo credits: City of Oulu

- 14 events other than conferences or workshops
 - 17 other events
 - 1 brokerage event
 - 6 activities jointly organised with other H2020 projects
 - 1 trade fair
 - 20 pitch events
 - 1 training
- 103 presentations were held

Through these events related activities, 12.434 persons were reached.

Details can be found in Annex II: Overview of Events.

5.5 Joint activities with SCC1 projects and other EU initiatives

Close interaction and exchange with the other twelve SCC1 projects are taking place, especially regarding joint replication and dissemination / communication activities. Within the second project year, the following activities have taken place:

- **Regular meetings and exchange:**

Regular meetings and telephone conferences among the SCC1 projects are happening – both on the coordination, dissemination / communication and replication level. We plan joint activities and align the project activities, where possible. CAR, as project coordinator, SEZ, as mySMARTLife D&C leader, and Nobatek, as mySMARTLife replication leader, are regularly participating in the meetings and telephone conferences.

- **Promotion of SCC1 projects:**

The regularly updated mySMARTLife website has a section of useful links that is under the header press corner – useful links.

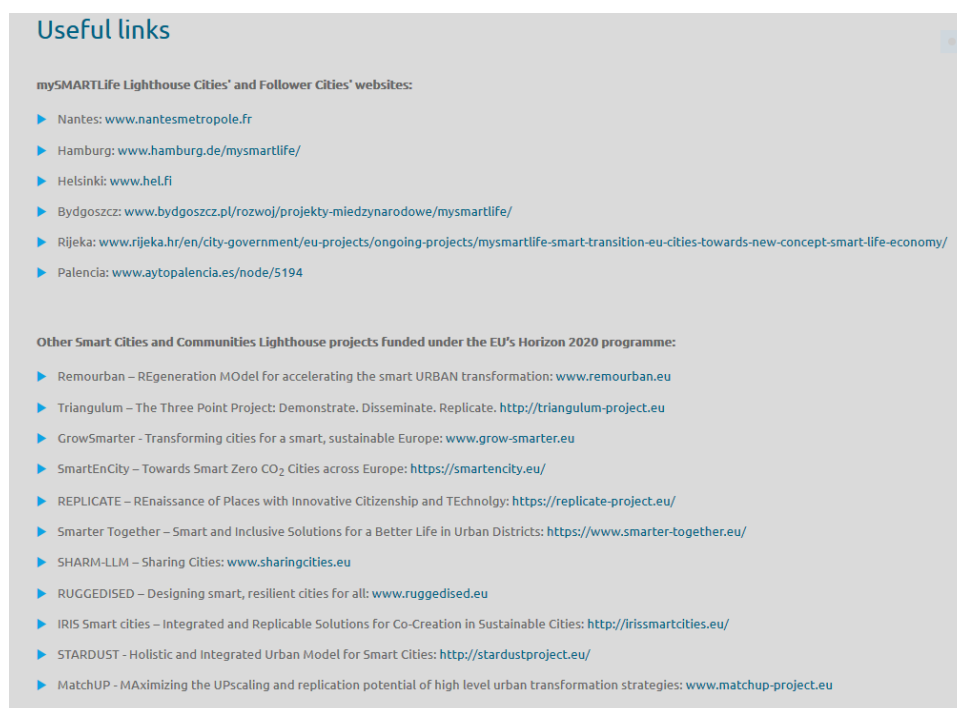

Figure 17: List of smart city projects on mySMARTLife website

- **Joint events and stands:**

Smart City Lighthouse Projects meet at the European Smart Projects Summit (San Sebastián, March 2019)

26 March 2019, San Sebastián, Spain: part of the mySMARTLife team and representatives of the other 13 European Smart Cities and Communities (Lighthouse) projects met for the European Smart Projects Summit in San Sebastián, Lighthouse City of Replicate. The purpose of the two-day summit was to foster further collaboration opportunities, exchange knowledge and to welcome the two new projects MAKING-CITY and +CityxChange to the family of Lighthouse Cities by signing the amended manifesto of cooperation between these 14 projects. Furthermore, a culture of exchange and learning was supported through a number of presentations, workshops, a study visit and internal working group meetings.

Figure 18: European Smart Projects Summit in San Sebastián⁸

Six parallel workshops covered issues like the transformation of districts into sustainable and smart buildings, sustainable urban mobility, funding possibilities for smart solutions, citizen engagement as well as data security and the energy transition. Our mySMARTLife colleagues Dr. Francesc Pardo Bosch from ESADE, Eduardo Miera from Tecnalia and mySMARTLife coordinator Rubén García Pajares moderated and spoke at three of the workshops.

Nordic Edge Expo (Stavanger, September 2019)

“Two thirds of Europe’s population live in urban areas and would immediately benefit from a more coherent and integrated approach to the grand challenges such as climate change. And while progress in cutting CO₂

⁸ Photo credits: Steinbeis-Europa-Zentrum

emissions and the delivery of core solutions is encouraging, far more needs to be done! This is why the European Commission launches the mission on “Climate-Neutral & Smart Cities.” says Haitze Siemers, Head of Unit in DG Energy who held a keynote speech at Nordic Edge Expos main stage.

On 24 September, the European Commission brought together key players like the European Innovation Partnership on Smart Cities and Communities (EIP-SCC), the Smart Cities Information System (SCIS) and European networks like EUROCITIES and Open & Agile Smart Cities (OASC) as well as representatives from smart city projects in the workshop “On a Mission for the European Cities of the Future - Achievements, Challenges, Opportunities” to discuss the Horizon Europe mission on carbon neutral and smart cities. mySMARTLife successfully attended the conference, joined the shared stand and attended the workshop.

Figure 19: mySMARTLife at Nordic Edge⁹

Smart Cities & Communities Lighthouse network event: Smarter Together, SCC Lighthouse network event (Lyon, October 2019)

In October 2019, the mySMARTLife project representatives met for the Smarter Together, SCC Lighthouse network event in Lyon. The Lyon event was the eighth event organised by the Smart Cities & Communities network. The previous events have either focused on replicating solutions from the Lighthouse Cities to Follower Cities (Brussels, Stavanger) or sharing experiences and best practices (San Sebastian, Sonderborg, Lisbon, etc.).

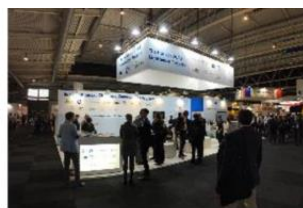

All those events have brought a lot of exciting knowledge sharing and have significantly contributed to the dissemination of best practices.

⁹ Photo credits: Steinbeis-Europa-Zentrum

In the Lyon event, the whole SCC01 network focused on so-called *makers' sessions* on the first day, using design-thinking methodology. The various groups worked on topics such as Buildings (new & refurbished), Integrated Infrastructure / data platform and services, Energy infrastructure (energy networks & renewable energy production, lampposts), mobility (mobility stations, electric buses...) and Well-being (public spaces, nature-based solutions, healthcare). As the working groups developed pitches, these were fine-tuned and presented on the following day in front of a jury.

Figure 20: Some pictures of the events attended by mySMARTLife partners

- **Joint Multitouch Tool:** A project overarching touch tool has been set up by all SCC1 projects and mySMARTLife has joined this initiative. The tool presents the different SCC1 projects, involved LHCs / FCs and their technical approaches.
- **Joint D+C Plan:** Together, the SCC1 projects have developed a joint Dissemination and Communication plan. The aim is to define the aims of the joint D+C activities of the projects, to coordinate activities amongst the projects and to define the roles of the projects. SEZ, as mySMARTLife D+C leader, is actively involved in the implementation of the plan.
- **Cooperation with other initiatives:** In addition to collaboration with other SCC1 projects, mySMARTLife is engaged in active collaboration with other relevant EU wide initiatives, such as the ESPRESSO project¹⁰, the EIP on Smart Cities and Communities¹¹ and the Smart Cities Information System (SCIS)¹².

¹⁰ <http://espresso-project.eu>

¹¹ http://ec.europa.eu/eip/smartcities/index_en.htm

¹² <http://www.smartcities-infosystem.eu>

In a meeting between VTT / SCIS 4/2018 it was agreed that mySMARTLife gives the dataset information (KPI's, Monitoring) when all monitoring starts in M36. And after that a set of data after 1 year (M48) as well as after 2 years (M60). The details of the data format and transition mechanism is agreed later.

Apart from these events in which all projects participated, some other events in which mySMARTLife was present in connection with this task were:

- Partnership working with EIP-SCC (22 February 2019 in Espoo)
mySMARTLife partner VTT, Stardust and MatchUp (as well as smart Otaniemi) projects have made a join effort to participate the new Strategic research innovation agenda 2.0: [EIP SCC Positive Energy Blocks cluster => STRATEGIC RESEARCH AND INNOVATION AGENDA](#) 2.0 of JIP Urban Europe and [European Energy Research Alliance](#)
- Joint Webinar with SCIS (April 2019)
Members of the mySMARTLife team took part and presented in a webinar organized by SCIS (Smart Cities Information System). The focus of the webinar where the implementation of e-buses in the mySMARTLife LHC Helsinki as well as the mySMARTLife LHC Nantes. The results of the webinar where fed into the solution guides published on the [SCIS website](#).
- During the last two reporting period, the mySMARTLife consortium has developed a strong working relationship with the SCIS (Smart Cities Information System) consortium as regular contributor to the SCIS newsletter Ask, Learn & Share. During M25 to M35 mySMARTLife has written numerous articles for Ask, Learn & Share. The SCIS newsletters is [here](#).
- EIP-SCC General Assembly (May 2019, Brussels)
Members of the mySMARTLife consortium took part in the General Assembly of the EIP-Marketplace. Representing mySMARTLife and actively taking part in the discussion fora.

The related deliverable is D7.1 "Report of lighthouse projects cooperation. Working groups and platform results". In this deliverable, all these activities are reported. The first version of D7.1 has been released on M12 (November 2017); others will follow in M36 and M60.

THIS DELIVERABLE HAS NOT YET BEEN APPROVED BY THE EC

6. Conclusions

During the third 12 months of mySMARTLife, all project partners have carried out a variety of Dissemination and Communication activities. During the first year, the WP8 activities developed the overall dissemination and communication structure within mySMARTLife, set up the project's corporate identity and the main communication materials and tools. In the second year, all communication and dissemination tools were further developed, adapted to project needs, and all project partners proactively promoted mySMARTLife as well as their individual activities. In the third year of mySMARTLife the processes have been established, material produced, and communications channels tried and tested. One of the main points of the third year was the increase in the use of mass media – or being able to engage with mass media. Video films, broadcasts and press releases played an important role in reaching very high and successful impact numbers.

The continuous focus stayed on the close cooperation and collaboration with the other SCC1 Lighthouse projects and other EU initiatives such as Smart Cities Information System (SCIS) and EIP SCC – The Marketplace, resulting, amongst other things, in joint activities such as articles for their newsletters as well as joined webinars with a focus on dissemination and communication.

With 599 communication and dissemination activities having been carried out by the consortium, among them 225 publications and further dissemination activities and 374 event related activities and reaching an estimated audience of almost 2.5 Million persons, it can be concluded that the project visibility has been very actively and efficiently driven forward during the third year of mySMARTLife.
